July 2012

Dear Friends,

I am pleased to introduce the 2012 Colorado Agricultural Statistics Bulletin. As a lifelong farmer, I understand the importance of solid, comprehensive statistics to help make decisions that affect the development of your operation.

The National Agricultural Statistics Service (NASS) provides the most accurate figures for Colorado agriculture. As you review the information, please take special note of the contribution agriculture provides to the economy of our state. Tracking this information is important, not only in showing the value of our industry, but also to assist in making informed decisions that will shape the future of Colorado agriculture.

As a \$40 billion industry, Colorado's agriculture industry provides a safe, abundant food supply while generating economic activity that is critical to this state's vitality. In addition, our state's farmers and ranchers provide wildlife habitat and preserve the open space and vistas for which our state is well known.

The Colorado Department of Agriculture is dedicated to promoting agriculture on the local, state, national, and global levels and consider these statistics a valuable resource in that effort. Our Department offers a variety of resources to help Colorado's agriculture industry, and I encourage you to visit [www.colorado.gov/ag](http://www.colorado.gov/ag) to learn more.

I would like to thank the NASS Colorado Field Office and all of the farmers and ranchers who make this book possible.

Sincerely,

John T. Salazar  
Commissioner

*The Colorado Agricultural Statistics publication is compiled by the Colorado Agricultural Statistics Service, which is an agency within the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.*

---

July 2012

Dear Friends of Agriculture:

One thing we can count on in Colorado is that we never know what the weather will do. Last year the drought took its toll in the south and southwest and this year the entire state has been affected. The affects of these droughts have been quite evident throughout the agricultural industry. The data we collect and publish are valuable tools in letting people make decisions regarding marketing, disaster programs, and research efforts especially in years like this.

With that, I am pleased to present the 2012 Colorado Agricultural Statistics Bulletin made available through the Colorado Field Office of the USDA's National Agricultural Statistics Service in cooperation with the Colorado State Department of Agriculture. Good decisions can only be made with good information. Our agency strives to deliver the timely, accurate and useful statistics that the agricultural industry depends on. On the following pages you will find much of that information including acreage, production and economic data from 2011 and earlier at the state and county level.

I want to thank the farmers and ranchers for taking time out of their busy schedules to provide the data needed to produce these statistics. I also want to thank the all the agribusiness, extension educators and the USDA's Farm Service Agency for contributing information for this bulletin and providing support for our programs.

This report would not be possible without the dedicated effort of field and telephone interviewers who collect this data. Also, thanks to the Colorado Field Office staff for the many hours involved in producing this bulletin. Thanks to Laurie Purcell of Grand Junction for the cover photography. And finally, a special thanks to the Colorado Department of Agriculture for covering the costs of printing this bulletin.

Sincerely,

William Meyer  
Director  
USDA NASS Colorado Field Office

## COLORADO

The Centennial State, admitted to the Union in 1876, is the eighth largest state in area and has the highest average elevation. The highest point is at Mount Elbert, 14,433 feet above sea level, one of the 53 "fourteeners" rising above 14,000 feet. The lowest elevation is 3,350 feet in extreme eastern Prowers County.

Approximate Land Area: 66.3 Million Acres \*  
 Approximate Cropland Area: 11.5 Million Acres \*  
 Approximate Irrigated Area: 2.6 Million Acres \*  
 Number of Farms and Ranches (2011): 36,700  
 Average Size of Farm and Ranch (2011): 853 Acres

<b>Farms by Type *</b>		<b>Farms By Tenure *</b>		<b>Farms By Class *</b>

## PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

### Marketing year average prices, by commodity, Colorado, 2002-2010
